

## **AMENDMENTS TO THE SPECIFICATION**

**Please amend the specification as follows:**

**Please amend the paragraph beginning page 1, line 4, with the following rewritten paragraph:**

This is a continuation-in-part of U.S. Application S.N. 10/622,189, filed July 18, 2003, now abandoned.

**Please replace the paragraph beginning page 6, line 5, with the following rewritten paragraph:**

Preferably, the (meth)acrylated polyester powder includes a radiation-sensitive oligomer including from 25 to 75 wt% (meth)acrylated epoxy oligomers and from 75 to 25 wt% (meth)acrylated polyester oligomers. The composition preferably includes a radiation-sensitive plasticizer in an amount of from 0 to 20 wt%, preferably 1 to 20 wt%. The plasticizer is preferably a semi-crystalline (meth)acrylated polyester, most preferably a semi-crystalline methacrylated polyester. Specific semi-crystalline methacrylated polyester ~~in-elued~~ include those commercialized under the name of UVECOAT®9010 (UCB Chemicals). The radiation-curable solid particulate composition preferably has an average particle size of from 10 to 150  $\mu\text{m}$ , from 30 to 150  $\mu\text{m}$ , and of about 50  $\mu\text{m}$ .
